

Mastering AI and Automation:

The EdgeVerve Way

Innovate, empower, unlock potential with AI and automation

The next step of business building is here with AI and Automation. Create sustainable ecosystems and drive revenue growth by staying ahead of the curve. With novel products and cloud-based hosting programs, business is changing for the better; one innovation at a time

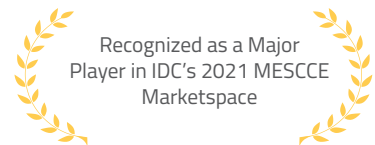

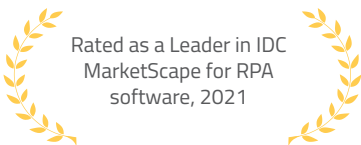

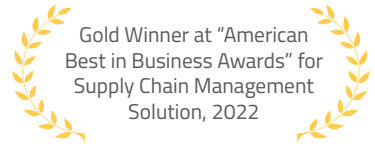

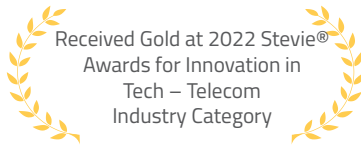

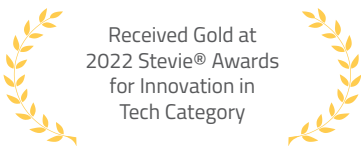

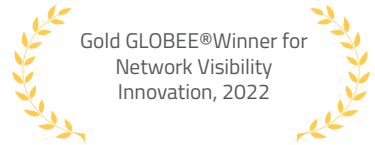

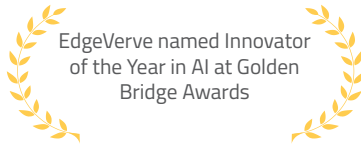

Enterprises today operate in a disruptive environment. Fast evolving customer needs, complex business models, and constant pressure on cost-control call for acceleration of digital transformation initiatives. Yet, scalability, security, and reliability are undoubtedly the three most significant challenges for enterprises in their digital transformation initiatives.

At EdgeVerve, we reimagine the way enterprises work for the better. We drive digital transformation by delivering intelligence and insights to transform processes, documents, and the supply chain.

Our digital platforms unlock hidden value for enterprises with our one-of-a-kind ecosystem - enterprise-grade platforms, last-mile delivery, all backed by a global IT leader - Infosys Limited. All this so that your business can thrive on our technology. Connect with us to unlock the potential of your business with our technology and bespoke trainings.

Awards & Recognition

EdgeVerve Academy - An Ecosystem for Futuristic Learning and Business Growth

What we offer

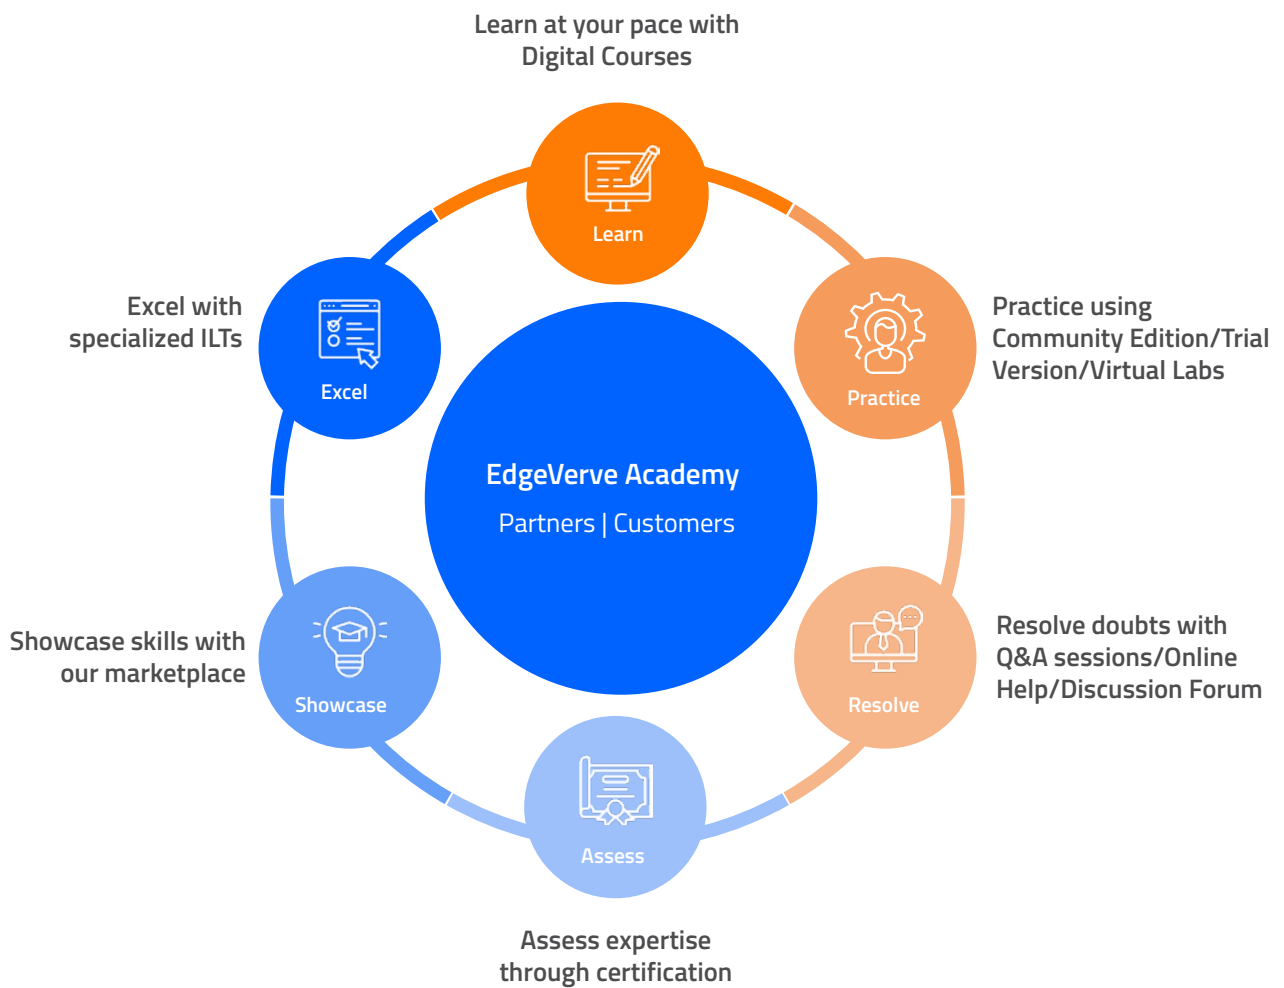

EdgeVerve Academy offers sharp learning curves to sanctify customer and partner ecosystems for implementing our digital platforms and services. Each learning path represents a progression of comprehensive training/self-paced digital courses to support the on-job specific learning needs of various roles such as Business Analysts, Sales, Pre-Sales, Implementation, Maintenance, Deployment, and Support Engineers. The Academy of excellence “pre-during-and post-learning” extended support helps learners to improve their competence and apply the learned knowledge and skills to their jobs in the right way and use our products seamlessly.

Key Assets

Making an ecosystem of growth

EdgeVerve Academy aims to help consumers understand the power of AI and automation-enabled solutions. The **EdgeVerve Academy** provides a contemplative learning framework to use our digital platforms easily. We offer dedicated E2E strategic, advanced & personalized training to cater to specific niches. Furthermore, our post-training query resolution & troubleshooting sessions ensure any doubts are cleared for added learning reinforcement. Finally, we run refinement programs via key account holders for the ultimate learning & honing experience.

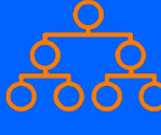

Built on the Infosys foundation

Leveraging the largest training institute globally for EdgeVerve's digital platform trainings, EdgeVerve has:

800+
Classrooms

40,000+

Course 1: AssistEdge RPA Fundamentals

Overview

The AssistEdge RPA Fundamentals provides a high-level review of the key benefits and features of AssistEdge RPA, including a short demonstration from an end-user perspective.

Course Prerequisites

RPA knowledge

Course Duration

3 Hours

Key Topics

- Introduction to AssistEdge RPA
- AssistEdge RPA offerings and components
- Automation Journey with AssistEdge RPA
- AssistEdge RPA Features and Benefits
- AssistEdge RPA Architecture and Security
- Deployment Models and Licenses
- Demonstration

Intended Audience

This course is geared toward enterprise executives, managers, sales, pre-sales, business analysts, developers (process designers and bot managers), and solution consultants.

Training Environment

No standard criteria

Course 2: AssistEdge RPA Developer – Level 1

Overview

The AssistEdge RPA Developer Level 1 course provides you with hands-on training for extending the functionality of AssistEdge RPA.

Course Prerequisites

AssistEdge RPA Fundamentals

Course Duration

12 Hours

Key Topics

- Recalling AssistEdge Enterprise RPA and Components
- Navigating Studio
- Processes & its Lifecycle in AssistEdge RPA
- Web Application Automation
- Sign-In and Reset Processes
- Excel Application Automation
- Re-use Processes
- PDF Automation
- Email Automation
- Bot Development and Governance

Intended Audience

This course is aimed at developers, maintenance, and support engineers.

Training Environment

This course requires an AssistEdge RPA training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment.

Course 3: AssistEdge RPA Developer – Level 2

Overview

The AssistEdge RPA Developer Level 2 course provides you with hands-on training for extending the advanced functionalities of AssistEdge RPA.

Course Prerequisites

AssistEdge RPA Fundamentals, AssistEdge RPA Developer Level 1

Course Duration

12 Hours

Key Topics

- Database Automation
- Data Table Operations Automation
- File Operations Automation
- FTP Operations Automation
- Advanced Loop Operations
- Image Automation
- Windows Automation - .Net object mode and windows mode
- SMTP Automation
- Process Migration, Rollback, Decommissioning Processes
- Bot Management Advanced

Intended Audience

This course is aimed at developers, maintenance, and support engineers.

Training Environment

This course requires an AssistEdge RPA training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment.

Course 4: AssistEdge RPA Highly Specialized Training

Overview	This is a highly customized training tailored as per customers' domain, needs, and use cases
Course Prerequisites	RPA Skills
Course Duration	20 hours
Key Topics	<ul style="list-style-type: none">AssistEdge RPA OverviewIntroduction to Automation StudioWeb Application Automation -Basics and AdvancedOutlook AutomationPDF AutomationProcesses Types - Sign-In and ReuseIntroduction to Intelligent AutomationCustomization with Microbots and Powershell automationIntegrate and Deliver Faster with GitSAP AutomationBot Management & GovernanceAssistEdge Reports (Topics can be tailored as per customer's requirements)
Intended Audience	This course is aimed at developers
Training Environment	This course requires an AssistEdge RPA training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment.
Course Certification	The course concludes with an online exam which tests the theoretical and practical knowledge of AssistEdge RPA process configuration and bot management aspects. Upon successful completion of the exam, learners gain Infosys Certified AssistEdge RPA Professional certification.
Supported Versions	18.x, 19.0

Course 1 : AssistEdge Discover Fundamentals

Overview

The AssistEdge Discover Fundamentals provides a high-level review of the key benefits and features of AssistEdge Discover, including a short demonstration from an end-user perspective.

Course Prerequisites

Process Discovery knowledge

Course Duration

2 hours

Key Topics

- Introduction to Process Discovery
- What is AssistEdge Discover?
- How AssistEdge Discover Works?
- AssistEdge Discover Functions and Features
- Security and Deployment Models
- Demonstration

Intended Audience

The course is geared towards enterprise executives, managers, sales, pre-sales, solution consultants, administrators, and business analysts.

Training Environment

No Standard Criteria

Course 2: AssistEdge Discover for Analysts

Overview

AssistEdge Discover for Analysts course enables you to unearth the nuances of process discovery using AssistEdge Discover's next-gen AI, interactive maps, and deep insights.

Course Prerequisites

AssistEdge Discover Fundamentals

Course Duration

7.5 hours

Key Topics

- Introduction to AssistEdge Discover
- Business Analysts role and responsibilities in AssistEdge Discover
- Sensing Data
- Reviewing & Analyzing Captured Data
- Consuming & Contextualizing Discover Outputs
- Reviewing and Cleaning Data
- Configuring Discover for Automatic Data Capture
- Business Analyst Configurations

Intended Audience

This course is geared towards business analysts.

Training Environment

This course requires an AssistEdge Discover training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment.

Course Certification

The course concludes with an online exam which tests the theoretical and practical knowledge of AssistEdge Discover Business Analysts aspects. Upon successful completion of the exam, learners gain Infosys Certified AssistEdge Discover Business Analyst certification.

Course 3: AssistEdge Discover for Administrators

Overview

The AssistEdge Discover of Administration course lets you understand the different deployment models, installation, configuration, customization, and troubleshooting aspects of AssistEdge Discover.

Course Prerequisites

AssistEdge Discover Fundamentals

Course Duration

4 hours

Key Topics

- Introduction to AssistEdge Discover
- Architecture and Deployment Models
- Single-System Server Deployment – SSL, SMTP & LDAP Configuration
- Discover Sensor Installation
- Troubleshooting and Reviewing Logs
- Administrator Configurations
- Processing Guidelines

Intended Audience

This course is geared towards deployment engineers and administrators.

Training Environment

This course requires an AssistEdge Discover training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment.

Course 1: AssistEdge Engage Fundamentals

Overview

The AssistEdge Engage Fundamentals provides a high-level review of the key benefits and features of AssistEdge Engage, including a demonstration from an end-user perspective.

Course Prerequisites

RPA skills

Course Duration

3 hours

Key Topics

- Understanding Market Realities and Opportunity
- AssistEdge Engage – Overview and Components
- AssistEdge Engage – Key Features
- Engage UI – Dashboard, Review, Process Initiation, and Sign In Manager
- Demonstration

Intended Audience

This course is geared towards enterprise executives, managers, sales, pre-sales, solution consultants, and developers.

Training Environment

No standard criteria

Course 2: AssistEdge Engage Highly Specialized Training

Overview

This course masters AssistEdge Engage 2.0 by learning fundamental AssistEdge Engage knowledge & skills and gaining practical experience by configuring contact center automations from scratch, leveraging low code platform for citizen developers to create contact center specific dashboards, and improvising the agent productivity by learning end user features of Engage.

Course Prerequisites

RPA skills

Course Duration

12 hours

Key Topics

- Introduction to AssistEdge Engage
- Engage Functions and Features
- Engage End-to-End Demo
- Introduction to Low Code Platform
- Admin Portal Configurations
- Process Configuration
- Engage Features and Process Automation
- Engage Customization – Web Engage
- Engage Customization – Thick Client Engage
- Engage Reports (Topics can be tailored as per customers' requirements)

Intended Audience

This course is geared towards enterprise executives, managers, sales, pre-sales, solution consultants, and developers.

Training Environment

This course requires an AssistEdge Engage training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment.

Course : XtractEdge Platform Fundamentals

Overview

The XtractEdge Platform Overview provides a high-level overview of the key benefits, features, and components of the XtractEdge Platform, including a short demonstration from an end-user perspective.

Course Prerequisites

Knowledge of Document Processing

Course Duration

2 hours

Key Topics

- Solving the Enterprise Document Conundrum
- using XtractEdge; Configuring Platform in Design Time & Consuming it in Runtime

Intended Audience

This course is geared towards enterprise executives, managers, sales, pre-sales, solution consultants, and developers

Training Environment

No Standard Criteria

Course : XtractEdge Platform - Roles Based Design Environment Walkthrough

Overview	The XtractEdge Platform Roles Based Design Environment Walkthrough embarks the learners on the journey of understanding the design time workbenches used to configure XtractEdge Platform to understand documents. XtractEdge Platform Fundamentals 2 hours <ul style="list-style-type: none">▪ Role based walkthrough of Design Time Workbenches of Extraction, Text Analysis, and Image Analysis
Course Prerequisites	This course is geared towards enterprise executives, managers, sales, pre-sales, solution consultants, and developers
Course Duration	No Standard Criteria
Key Topics	
Intended Audience	
Training Environment	

Course : XtractEdge Platform - Runtime and End-to-End Document Processing Walkthrough

Overview	The XtractEdge Platform Runtime and End-to-End Document Processing Walkthrough help learners understand how Platform is used during production and how the end-to-end document processing is achieved.
Course Prerequisites	XtractEdge Platform Fundamentals
Course Duration	2 hours
Key Topics	<ul style="list-style-type: none">Walkthrough of using XtractEdge Platform in Production
Intended Audience	This course is geared towards enterprise executives, managers, sales, pre-sales, solution consultants, and developers
Training Environment	No Standard Criteria

Course : XtractEdge Platform - Extraction Workbench

Overview

The XtractEdge Platform Extraction Workbench training helps learners to extract intelligence from set of structured or unstructured enterprise documents, regardless of template / layout complexity / domain specificity.

Course Prerequisites

XtractEdge Platform Fundamentals

Course Duration

6 hours

Key Topics

- Regular & Advanced Document Processing; Handling of Low Accuracy Extractions; Templated Extractions

Intended Audience

This course is geared towards enterprise executives, managers, sales, pre-sales, support, solution consultants, and developers

Training Environment

This course requires an XtractEdge Platform training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment

Course : XtractEdge Platform - Text Analysis Workbench

Overview

The XtractEdge Platform Text Analysis Workbench training helps learners to harness natural language processing capability of XtractEdge Platform for easy retrieval of intent and entities from documents using Deep Learning (DL) Model.

Course Prerequisites

XtractEdge Platform Fundamentals

Course Duration

4 hours

Key Topics

- Role based usage of Text Analysis Workbench

Intended Audience

This course is geared towards enterprise executives, managers, sales, pre-sales, support, solution consultants, and developers

Training Environment

This course requires an XtractEdge Platform training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment

Course : XtractEdge Platform - Image Analysis Workbench

Overview

The XtractEdge Platform Image Analysis Workbench training helps learners to harness the in-built computer vision capability of XtractEdge Platform for detecting objects, and classifying information based on visual attributes from digital documents.

Course Prerequisites

XtractEdge Platform Fundamentals

Course Duration

5 hours

Key Topics

- Role based usage of Image Analysis Workbench

Intended Audience

This course is geared towards enterprise executives, managers, sales, pre-sales, support, solution consultants, and developers

Training Environment

This course requires an XtractEdge Platform training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment

Course : XtractEdge Platform - Image Based Deployment Overview

Overview

The XtractEdge Platform Image Based Deployment Overview provides a high-level understanding of the manual image-based deployment flow of XtractEdge Components in the Kubernetes cluster.

Course Prerequisites

XtractEdge Platform Fundamentals

Course Duration

5 hours

Key Topics

- XtractEdge Platform Component Overview; Deployment Pre-Requisites; Image Based Deployment Flow of Platform in K8S; Practice Kubectl commands for Platform Deployment

Intended Audience

This course is geared towards product administrators, support, solution consultants, and developers

Training Environment

This course requires an XtractEdge Platform training environment for performing hands-on during the training. The EdgeVerve team will help trainees to set up the training environment

Course : XtractEdge Platform - Image Based Commons Deployment

Overview

The XtractEdge Platform Image Based Commons Deployment training helps the learner to understand how to manually deploy Redis, Postgres, Keycloak, and NiFi components of XtractEdge Platform with Non-SSL Mode in the Kubernetes Cluster.

Course Prerequisites

XtractEdge Platform - Deployment Overview

Course Duration

4 hours

Key Topics

- Learn to execute queries in the XtractEdge Platform Postgres Database; Configuring and accessing Keycloak and NiFi; Onboarding tenants and users in Keycloak

Intended Audience

This course is geared towards product administrators, support, solution consultants, and developers

Training Environment

No Standard Criteria

Course : XtractEdge Platform - Image Based Extraction Deployment

Overview

The XtractEdge Platform Image Based Extraction Deployment training helps the learner to understand how to manually deploy platform commons and extraction components of XtractEdge Platform with Non-SSL Mode in the Kubernetes Cluster.

Course Prerequisites

XtractEdge Platform - Commons Deployment

Course Duration

4 hours

Key Topics

- Understand how to onboard tenant in Multitenancy; Learn to setup ingress for extraction components; Access Deployed Components and perform general troubleshooting

Intended Audience

This course is geared towards product administrators, support, solution consultants, and developers

Training Environment

No Standard Criteria

About EdgeVerve

EdgeVerve Systems Limited, a wholly-owned subsidiary of Infosys, is a global leader in developing digital platforms, assisting clients to unlock unlimited possibilities in their digital transformation journey. Our purpose is to inspire enterprises with the power of digital platforms, thereby enabling our clients to innovate on business models, drive game-changing efficiency and amplify human potential. Our platforms portfolio across Automation (AssistEdge), Document AI (XtractEdge), and Supply Chain (TradeEdge) helps inspire global enterprises to discover & automate processes, digitize & structure unstructured data and unlock the power of the network by integrating value chain partners. EdgeVerve, with a deep-rooted entrepreneurial culture, our innovations are helping global corporations across financial services, insurance, retail, consumer & packaged goods, life sciences, manufacturing telecom and utilities, and more. Visit www.edgeverve.com to know more.
