# Feel the power of generative AI with our new document processing platform

Data is only valuable if it can be translated into actionable insights. Enterprises need a cutting-edge Intelligent Document Processing platform to extract all the data hidden in billions of digital and paper-based documents and turn it into valuable insights to help businesses make holistic decisions. The IDP platform must be easy to deploy, simple to use, and quick to scale to deliver real value.

# Launching XtractEdge 4.0

XtractEdge 4.0, our generative AI-powered Intelligent Document Processing platform, unlocks new possibilities by transforming data into insights.

Powered by generative AI technology, the platform takes document processing to a whole new level of speed, accuracy, and efficiency. A modular platform, XtractEdge 4.0 democratizes document processing empowering both IT and business users to transform any document, whether structured or unstructured, into data. With its advanced capabilities, XtractEdge 4.0 streamlines document-intensive operations at scale delivering contextual insights that enable data-driven decisions.

XtractEdge 4.0, caters to varied business and industry use cases, delivering value beyond data extraction, enhancing productivity, and amplifying human potential for your enterprise.

## The platform simplifies the document processing and consumption experience through:

- **Extracting:** Ingest, identify and extract usable information from varied document formats through AI model configuration and on the fly conversational search capabilities.
- **Enriching:** Verify and enrich insights by consolidating data fragments across silos with data from third-party data providers
- **Empowering:** Provide business users with useful information through familiar interfaces to enable insights-driven decisions

## Key modules

### Design Studio for intuitive extraction

- **Create and test** document extraction models as per your business need
- **Unified access** for business users to configure document extraction models in a simple and intuitive manner
- **Conversational interface** to search, summarize and generate precise information from documents

### Document Processor for scaling document processing

- **End-to-end extraction process** using intuitive interfaces from document ingestion, through to enhancement, data extraction, validation, and integration with incumbent systems to make the extracted insights available to the end users
- **Monitoring dashboard** providing a complete view of document volume processed, straight-through processing rate, SLA adherence and accuracy

### Operations Studio for straight-through processing

- **Case management** to review all related information holistically
- **Single-pane view** enabling users to contextually review data from documents, third parties and internal sources
- **Human-in-the-loop capability** with workflows and rules supporting the validation of extracted data and updates to missing data
- **Customized user interface** created using low-code developer

# Why XtractEdge?

## Next-generation document processing

- Enables both business and technology users to convert any document into usable data.
- Build customized solutions leveraging generative AI capabilities

## Enhanced user experience

- Single-pane view for contextualized review experience
- Customized interfaces to increase adoption and reduce training efforts

## Unmatched scale

- Designed to scale for high-volume workflows
- Ability to handle variety and complexity of documents

## Complete auditability

- Audit capability providing a complete view of all actions taken
- Active performance monitoring through operational monitoring dashboards

# How XtractEdge is helping enterprises on their data-to-insights journey

## Accelerated underwriting review for US financial services firm

- Streamlined underwriting eligibility review workflows significantly improving operational efficiency
- Enabled the underwriting team to determine eligibility quickly reducing manual effort
- Converted highly unstructured data into meaningful structured information driving greater insights and efficiencies.

### About EdgeVerve

EdgeVerve Systems Limited, a wholly-owned subsidiary of Infosys, is a global leader in developing digital platforms, assisting clients to unlock unlimited possibilities in their digital transformation journey. Our purpose is to inspire enterprises with the power of digital platforms, thereby enabling our clients to innovate on business models, drive game-changing efficiency and amplify human potential. Our platforms portfolio across Automation (AssistEdge), Document AI (XtractEdge), and Supply Chain (TradeEdge) helps inspire global enterprises to discover & automate processes, digitize & structure unstructured data and unlock the power of the network by integrating value chain partners. EdgeVerve, with a deep-rooted entrepreneurial culture, our innovations are helping global corporations across financial services, insurance, retail, consumer & packaged goods, life sciences, manufacturing telecom and utilities, and more.
